NOTE: The new form of the index has made it possible to increase the amount of information offered, keep the extensive cross-reference, make it easier to read, and to economize on space by the elimination of duplicate wordage.

The added information takes the form of a Main Entry in the Authors' Index where, in brackets [ ] following the title, are listed references to information in the article not named in or implied by the title. All references in the subject index are to this Main Entry so that a person looking up any one reference to an article is led at once to *all* the indexed information.

In the Subject Index asterisks (*) indicate that an article deals with a subject at length.

Words in parentheses ( ) distinguish between articles written by the same author.

INDEX TO VOLUME 37-A

(American Volume)

1955

AUTHORS

A

PAGE

Abbott, LeRoy C. *See* **Jergesen, Floyd.**
